(54) Title: MOBILE RADIATION TREATMENT VEHICLE AND METHOD

(57) Abstract: A mobile radiation treatment vehicle (10) is disclosed including, a patient treatment compartment (11) having at least one radiation shield member (12b), the at least one radiation shield member positioned to prevent at least a portion of radiation emitted from a treatment device from passing through an interior of the patient treatment compartment (11) to an outside area. The treatment device is capable of emitting radiation used in connection with radiation therapy and is positioned in the patient treatment compartment (11). A shielded partition member is positioned in the patient treatment compartment (11) and is proximate to the treatment device. The shielded partition member positioned to reduce or prevent exposure to a user from radiation emitted from the treatment device during patient treatment.
